### Profile Summary

Frontend Engineer with 14 years of experience designing and building high-performance, front-facing web experiences across enterprise, agency, and freelance environments. Specializes in translating concepts into production-ready interfaces using Figma, HTML, CSS, and JavaScript, with a strong focus on usability, accessibility, performance, and visual clarity. Known for owning web experiences end-to-end—from exploration and prototyping through implementation—while balancing brand, business goals, and technical constraints.

### Core Skills

- Design-to-Code Execution (HTML, CSS, JavaScript, Vue.js)
- Web & UI Design (Figma, visual hierarchy, responsive layouts)
- Accessibility & Web Standards (WCAG-aware, W3C, cross-browser)
- Information Architecture & Content Structure
- Performance-aware design for the browser
- Collaborative development/design reviews and feedback

### Work Experience

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
