Profile Summary

Web designer with 3 years of web design experience and over 12 years in web development, specializing in responsive, user-centered websites. Passionate about clean design, strong visual hierarchy, and usability. Skilled in Figma, HTML, CSS, and JavaScript, combining design vision with practical, accessibility-focused implementation.

Work Experience

Envoy	Freelance Web Designer/Web Developer Partnered with clients to translate requirements into accessible Zendesk Help Center designs aligned with brand guidelines, creating Figma mockups and occasionally coding and implementing designs directly in Zendesk to ensure consistency and usability. Conducted feedback sessions to refine designs using Figma, ensuring high approval rates and client satisfaction through a detail-oriented approach. Utilized HTML, CSS, and JavaScript to create responsive dashboards, improving data accessibility for clients and ensuring cross-browser compatibility.
Zendesk	Web Developer Contributed to the development of innovative web solutions at Zendesk, enhancing user engagement and ensuring adherence to brand guidelines. Transformed Figma mockups into functional, responsive HTML and CSS for data-heavy, security-focused environments, streamlining development while maintaining performance and reliability. Conducted client meetings to design and demonstrate custom Zendesk help centers tailored to client needs, managing multiple projects effectively. Utilized GitHub for version control and Postman for API testing, improving team collaboration and troubleshoot technical issues.
TransUnion	Front End Web Developer II Collaborated with cross-functional teams in an agile environment to deliver credit-based web products, managing multiple projects and deadlines. Built and refactored front-end components using HTML5, CSS3, JavaScript, and XML within a CMS, ensuring cross-browser compatibility and responsive design. Integrated UI with back-end Java methods and REST APIs; performed front-end troubleshooting and debugging, demonstrating strong attention to detail. Conducted code reviews and maintained shared repositories across development teams. Partnered with QA to identify, document, and resolve bugs; performed regression testing on internal platforms, ensuring quality assurance. Worked with marketing to implement and optimize features using Optimizely, Google Ad Manager, and Google Analytics, contributing to SEO efforts.
Subplot Studio	Front End Web Developer Developed custom WordPress themes using HTML5, CSS3, and PHP, adhering to brand guidelines. Built 6+ responsive, lightweight websites following best practices for UX and cross-browser compatibility. Collaborated with designers to implement visually accurate builds from mockups. Maintained client sites: plugin updates, bug fixes, and general support, demonstrating organized project management. Edited and optimized images in Adobe Photoshop and designed print-ready playbill layouts in Adobe InDesign.
Etna Interactive	Front End Web Developer Developed responsive websites for medical practices using HTML5, CSS, and jQuery, ensuring cross-browser compatibility. Collaborated with developers to establish web standards and best practices, contributing to quality assurance. Managed time effectively within budget and deadline constraints, demonstrating organized project management. Maintained and updated sites for design refreshes, bug fixes, and SEO improvements.
