Profile Summary

Over 12 years of experience in web development, now focused on front-end design and building responsive websites. Passionate about crafting clean, user-centered digital experiences with strong attention to aesthetics, color, typography, layout, and usability. Proficient in Figma, HTML, CSS, and JavaScript, combining design vision with technical execution. My development background ensures designs are not only visually impactful but also practical and efficient to build, aligning with brand guidelines and SEO best practices.

Work Experience

Envoy

May 2023 - Present

Freelance Web Designer/Web Developer

Engaged with clients to understand their needs, resulting in custom Zendesk Help Center designs that aligned with their brand identity.

Conducted multiple feedback sessions to refine designs, ensuring high approval rates and client satisfaction through a detail-oriented approach.

Utilized HTML, CSS, and JavaScript to create responsive dashboards, improving data accessibility for clients and ensuring cross-browser compatibility.

Zendesk

June 2019 - April 2023

Web Developer

Contributed to the development of innovative web solutions at Zendesk, enhancing user engagement and ensuring adherence to brand guidelines.

Transformed mockups and designs from Figma into functional HTML and CSS, streamlining the development process and ensuring responsive design.

Utilized GitHub for version control and Postman for API testing, improving team collaboration and troubleshoot technical issues.

Conducted client meetings to design and demonstrate custom Zendesk help centers tailored to client needs, managing multiple projects effectively.

TransUnion

November 2016 - September 2018

Front End Web Developer II

Collaborated with cross-functional teams in an agile environment to deliver credit-based web products, managing multiple projects and deadlines.

Built and refactored front-end components using HTML5, CSS3, JavaScript, and XML within a CMS, ensuring cross-browser compatibility and responsive design.

Integrated UI with back-end Java methods and REST APIs; performed front-end troubleshooting and debugging, demonstrating strong attention to detail.

Conducted code reviews and maintained shared repositories across development teams.

Partnered with QA to identify, document, and resolve bugs; performed regression testing on internal platforms, ensuring quality assurance.

Worked with marketing to implement and optimize features using Optimizely, Google Ad Manager, and Google Analytics, contributing to SEO efforts.

Subplot Studio

July 2015 - September 2016

Front End Web Developer

Developed custom WordPress themes using HTML5, CSS3, and PHP, adhering to brand guidelines.

Built 6+ responsive, lightweight websites following best practices for UX and cross-browser compatibility.

Collaborated with designers to implement visually accurate builds from mockups.

Maintained client sites: plugin updates, bug fixes, and general support, demonstrating organized project management.

Edited images in Adobe Creative Suite (Photoshop) and designed layouts.

Etna Interactive

July 2011 - June 2015

Front End Web Developer

Developed responsive websites for medical practices using HTML5, CSS, and jQuery, ensuring cross-browser compatibility.

Collaborated with developers to establish web standards and best practices, contributing to quality assurance.

Managed time effectively within budget and deadline constraints, demonstrating organized project management.

Maintained and updated sites for design refreshes, bug fixes, and SEO improvements.

Trained new team members on development processes and workflows.
