

KRISTIN BURTON

User Interface Developer

Profile Summary

Seasoned front-end developer with 12+ years of experience creating responsive, accessible, and visually cohesive user interfaces for eCommerce platforms. Skilled in HTML, CSS, JavaScript, Figma, and Git, I blend graphic design principles with technical execution to deliver high-performing, user-centric web experiences. I excel in cross-functional collaboration within agile development environments, optimizing UI for speed, accessibility (WCAG), and brand impact, aligning with user experience best practices.

Work Experience

Envoy

May 2023 - Present

Freelance Web Designer/Web Developer

Collaborated with 15+ B2B and B2C clients to identify requirements and pain points, resulting in tailored Zendesk Help Center designs that strengthened brand consistency and user experience.

Conducted feedback sessions to refine designs, ensuring high approval rates and client satisfaction.

Developed responsive reporting dashboards using HTML, CSS, and JavaScript, improving data accessibility for clients and enabling Envoy to productize and sell the solution.

Zendesk

June 2019 - April 2023

Web Developer

Contributed to the development of innovative web applications at Zendesk, enhancing user engagement through effective UI implementation.

Transformed mockups into functional HTML and CSS, streamlining the development process and ensuring pixel-perfect representation.

Utilized Git and Postman for version control and API testing, improving team collaboration and code quality.

Conducted client meetings to design and demonstrate custom Zendesk help centers tailored to client needs, ensuring alignment with user interface goals.

TransUnion

November 2016 - September 2018

Front End Web Developer II

Collaborated with cross-functional teams in an agile development environment to deliver credit-based web products, adhering to scrum methodologies.

Built and refactored front-end components using HTML5, CSS3, JavaScript, and XML within a CMS, ensuring cross-browser compatibility and adherence to graphic design principles.

Integrated UI with back-end Java methods and REST APIs; performed front-end troubleshooting, cross-browser compatibility testing, and debugging to ensure consistent user experience.

Conducted code reviews and maintained shared repositories using Git across development teams.

Partnered with QA to identify, document, and resolve bugs; performed regression testing on internal platforms, demonstrating precision in quality assurance.

Worked with marketing to implement and optimize features using Optimizely, Google Ad Manager, and Google Analytics, contributing to data-driven marketing strategies.

Subplot Studio

July 2015 - September 2016

Front End Web Developer

Developed custom WordPress themes using HTML5, CSS3, and PHP, applying typography and layout best practices.

Built 6+ responsive, lightweight websites following best practices for user experience and performance.

Collaborated with designers to implement visually accurate builds, ensuring adherence to graphic design principles.

Maintained client sites: plugin updates, bug fixes, and general support, ensuring consistent site functionality.

Edited images in Photoshop and designed layouts in InDesign, demonstrating proficiency in multimedia asset creation.

Etna Interactive

July 2011 - June 2015

Front End Web Developer

Developed responsive websites for medical practices using HTML5, CSS, and jQuery, focusing on user interface and user experience.

Collaborated with developers to establish web standards and best practices, contributing to information technology infrastructure.

Managed time effectively within budget and deadline constraints, demonstrating commitment and precision.

Maintained and updated sites for design refreshes, bug fixes, and SEO improvements, ensuring consistent brand representation.
